### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 6 and 7 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6 and 7 not been further treated on the merits.

### ***Claim Rejections - 35 USC § 103<sup>1</sup>***

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 5,847,237. USP 5,847,237 teaches that the catalyst composition that embraces the claimed composition. The reference teaches that the composition can be a mixture of basic magnesium carbonate and magnesium hydroxide, note the second full paragraph of column 4. While the reference does not teach the instant ratios, the claim range is so broad as to embrace most of the possible ratios. Moreover, the reference places no limitation of the amount of each component and one would expect a variety of such mixtures to be suitable in the prior art process including those within the broad range of ratios embraced by the instant claims. While the prior art composition may contain addition components, this is of no moment since the instant claims do not exclude the

<sup>1</sup> The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

presence of these additional components. The comparative example given in the specification is noted but not found persuasive of patentability. The example is not considered to be representative of the prior art catalyst composition. Nor is the claimed catalyst composition closest to the prior art compared.
